

BATTSCAN

High Voltage Battery Analyzer
For Hybrid Electric Vehicles

BATTSCAN is a High Voltage Battery Analyzer that provides simple, usable test results to determine the state of health of a Hybrid Vehicle's High Voltage Battery.

Know IF and when a high voltage battery needs service or replacement.

Fuel economy and performance issues in a Hybrid Vehicle are not always an indicator of a poorly performing high voltage battery. Avoid costly customer returns by analyzing the health of the High Voltage Battery before and after a repair.

Get a simple Test Result

BATTSCAN provides a simple diagnostic reading that will tell you and your customer if their vehicle's HV Battery is healthy, or whether it needs service or replacement.

Provide a new service or prevent warranty returns

Capture new revenue streams and give your hybrid-driving customers a reason to bring their vehicle to you rather than returning it to the dealer. Utilize BATTSCAN as part of vehicle inspections, regular maintenance, pre-repair diagnostics, and post-repair validation.

Simple results for complex Hybrid Battery Testing

BATTSCAN

High Voltage Battery Analyzer
For Hybrid Electric Vehicles

Each BATTSCAN kit includes:

- iOS/Android Device App
- DLC Connector and Data streamer
- Dust bag and promo window cling
- 1 year of BATTSCAN app/software licensing
- 5 on-demand training courses
 - Two Safety Courses
 - Introductory Hybrid Vehicle Training
 - Service Advisor Training
 - How to use BATTSCAN test results

Price: \$998.00

(\$549 annual software renewal)
